### Semiconductor Anti-counterfeiting Poster is Made

Through participation to the World Semiconductor Council (WSC), Semiconductor Industry Association in Japan (JSIA) commits to fighting the semiconductor counterfeit products and reducing their potential threats.

JSIA made a poster on semiconductor anti-counterfeiting and presented it in the semiconductor international conference held in the end of September. The poster explains a threat of anti-counterfeiting with conspicuous design and coloring and receives compliments.

In Japan, the poster was posted on the CEATEC JAPAN 2013 at Makuhari from October 1 to 5, the EDS Fair 2013 at Yokohama from November 20 to 22, and the SEMICON Japan 2013 at Makuhari from December 4 to 6. The poster is expected to facilitate the awareness raising on anti-counterfeiting in other regions such as China, Chines Taipei, Europe, Korea, and the United States.
